

Quality Statement

This report has been prepared with every care and has been checked as part of our quality procedure.

The results of experiments and analyses relate only to those samples tested and "as received". Any opinions expressed are based on these results together with other information supplied by the client and received in good faith and are outside the scope of UKAS accreditation . ETC Brunel cannot be held responsible or liable in respect of the use to which the information contained in this report is put.

Where micrographs are included in the report, the indicated magnifications or scale markers are accurate to within $\pm 10\%$ unless otherwise stated.

This report may only be reproduced in its entirety unless permission to do otherwise has been obtained from ETC Brunel University.
